

## ARCHKITCHEN V8

### What's it?

ArchKitchen is a Design/Order automation program. As a CAD substructure, it uses Microstation Triforma which is produced by Bentley. ArchKitchen's working scheme is as below. All placed/drawn products forms a price production which arises from databases. In ArchKitchen, any kitchen element which isn't placed in design place cannot be priced in anyway.

### Order Forming / Controlling Present Orders

When we first enter in the program, *order list* window is seen. In the window we can see our present order in file base. When we double clic on the order, file opens.

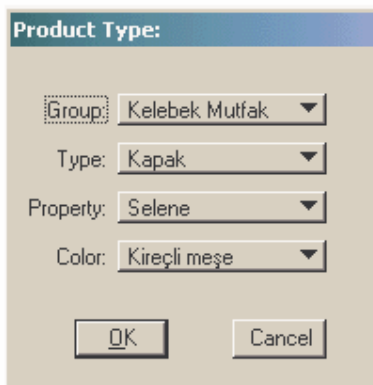

Order Number	Ch	Change Date	Order Typ	Definition
000104S00002	1	30.08.2004 13:50	S	Tolga Akhuy
000104S00001	1	30.08.2004 13:27	S	tolga1

If you form a new order, you choose *New Order* command from the menu of ArchKitchen.

At **New Order** table, in every line you can enter the informations about new order. For example: Vanessa, cover: Mosaic.

In this table, as you can see below the property and color informations must be given for product type.

These informations can be changed afterwards.

In the table below, when you enter the informations which are stated with red, and clic on **OK** button, you open a new order file. You should also enter the customer name to **definition** part.

**Order Information**

Order Type: Sipariş Pricing: Perakende (1+9)

Definition: Hüseyin Çabuk

Height: 12 Customer: Select
