

# Coloured Printing with Letterhead in ArchKitchen

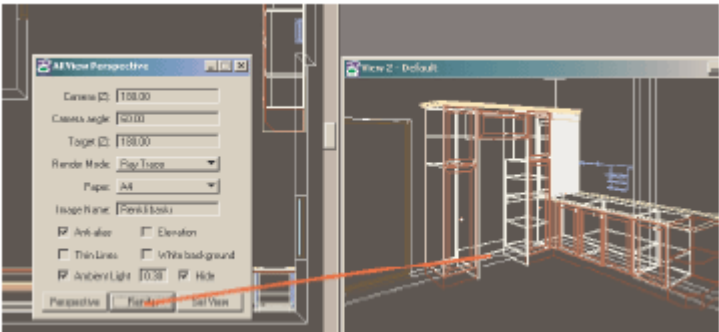

1 Place the camera

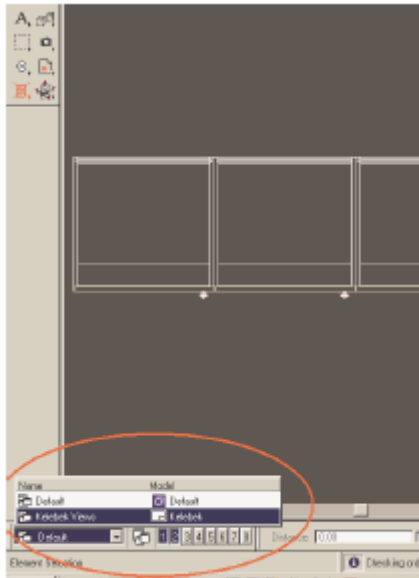

2 Set the perspective view. Close the left, right, upper and lower blank spaces.

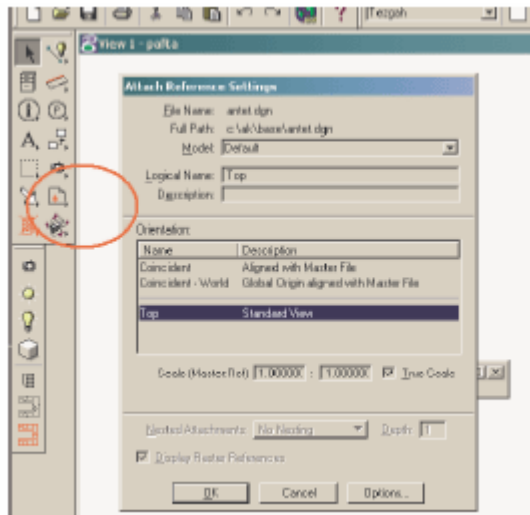

3 Save the image file

4 Choose *kelebek views* from the dialog window which is placing at the left below of the page. And pass to *print out page*.

5 Take the letterhead in the page. If there is an empty letterhead in the page, there's no use for taking a new letterhead.

6 Put the image from *raster manager*.
